Dated: November 9, 2005 Signature: (Joseph B. Lerch)

IN THE DESCRIPTION

At page 5, after line 28, please enter the following paragraph:

In accordance with the present embodiment, the animated character and sound are rendered through software technology which is already present in the computer for the production of graphic information and sound. Two general-purpose graphics/multimedia programs have been identified: Flash and GIF to display graphic objects. It has also been disclosed that sound may be provided in the form of a WAV object, and previously it has been indicated that MP3, Quicktime, Real Audio, and AVI objects may also be used. Thus, use is made of general-purpose multimedia software which is already present on the computer. This makes it unnecessary to have software installed on the computer which is “dedicated” to the production of the multimedia characters, i.e. it has no other purpose.
